## EDUCATION

---

**New York University**—M.S. in Computer Engineering(GPA: 3.77/4)

*Sep. 2021 - May. 2023*

**University of Science and Technology of China**—B.S. in Applied Physics

*Sep. 2017 - July. 2021*

## TECHNICAL SKILLS

---

**Programming Language:** Java, Python, JavaScript, TypeScript, PHP, C++, Bash/Shell Scripting

**Frameworks:** React, Redux, Hack, Spark, Next.js, Angular, Spring, Axios, Bootstrap

**Database:** MongoDB, MySQL

**CI/CD & Development Tools:** Git, Docker, Jenkins, Travis-CI, Node.js, AWS

**Architecture & Methodology:** Microservices, Object-Oriented Programming, MVC

## WORK EXPERIENCE

---

**Software Engineer Intern**

May. 2022 - Aug. 2022

*Meta Platforms, Inc*

*Seattle - United States*

- Worked on improving fundamental aspects of the real-time business impersonation detection flow for high-value brands with **Machine Learning** technologies in Ads problem team.
- Set up multiple data pipeline with **Python** to expand image detection recall and implemented new trigger in back-end enforcement infra with **PHP** for similarity detection.
- Manipulated data with **SQL** and analyzed with **GraphQL**. Retrieved feature and retrain entity-agnostic classifier.
- Achieved **94% detection rate** and improved **21% daily match volume** of imposters on extended coverage of photos.

## PERSONAL PROJECT

---

**Highly Scalable MERN-Stack Application with AWS – Hacker.io**

- Developed with **React** and **Next.js** for client-side and **Node.js**, **Express**, **MongoDB** for server-side.
- Maintained **AWS** services such as **S3** for files storage, **SES** for sending emails and **EC2** for cloud hosting, **IAM** for Identity and access management. Route 53 for domain management along with custom rules/policy.
- Aimed for low cost of operation and implemented functionalities to make it much easier and engaging to use.

**Spring Framework Web Application – PetsClinic**

- Utilized **Spring Boot**, **Spring MVC**, and **Spring Data JPA** to create functions with H2 database.
- Constructed Test Driven Development (TDD) with **JUnit 5** and **Mockito** and set up Continuous Integration builds with **CircleCI**.
- Converted the old version to reactive application with **WebFlux** framework and deployed to a **Docker** container.
- Implemented **RESTful APIs** with Spring MVC and added custom exception handling, form validation.

**Full-Stack Application based on Angular and Spring Boot – Luv2Shop**

- Adapted **Angular** for client-side and **Spring Boot** for server-side linked with RESTful API.
- Generated and updated component with **TypeScript** class and Angular service and integrated HTML template with **Bootstrap** CSS to style.
- Implemented dynamic search component with **Query** method and added pagination to **MySQL**.
- Created RESTful APIs with Spring Data **JPA Repositories** and utilized Angular validators, **Oktafor** for check-out authorization with **JWT**.

**MERN-Stack Real-Time Web Application – Eshop**

- Constructed users data with **MongoDB** and Express **Validator**, used middleware to achieve authorization.
- Utilized **Axios** to send request and created reusable components with **Bootstrap**.
- Designed **CRUD** Routes with **RESTful APIs** and extracted **Stripe** API for online payment.
- Pushed to dockerhub using a **CI/CD** offered by **Travis-CI** and saved static images to **Google Cloud** Storage.
